Router » Cable Modem » Configuration

This page provides information about the manually configurable settings of the Cable Modem.

Item	Value
Favorite Frequency (Hz)	626000000 Apply

Note:
Resetting the cable modem to its factory default configuration will remove all stored parameters learned by the cable modem during prior initializations. The process to get back online from a factory default condition could take from 3 to 5 minutes. Please refer to the cable modem User Guide for details on the power up sequence.

Factory Reset

Reboot
